

Refuse container with 50/50 Split Lid

300 gallon refuse container with full split lid

- Units are made of polyethylene resin for noise reduction and no surface rust.
- Lids available in multiple colors to designate refuse, recycling, or yard waste collection.
- Lid rotates 110° for easier loading, dumping, and independent closing after container is emptied.
- Rotationally molded seamless construction/uniform wall thickness.
- Easily accessible loading height.
- 3 year limited warranty (under normal use).
- Reinforced side walls for heavy use.
- Available in commonly used sizes. 200, 300, and 450 gallon capacity.
- Lids are attached with four "molded-in" hinge holes and large hinge pins to add strength and minimize damage encountered with excessive use.
- Molded in bilingual instructions (English/Spanish).
- Containers have a smooth high gloss interior surface that are designed for self cleaning.
- Water tight lid has wind restrictive feature to prevent from going past the breaking point.
- UV (ultraviolet) stabilizer protection to resist surface fading.
- Split pins are 3 1/2" x 7/16" heavy duty plastic using 13 gauge zinc plated pin clip.
- Molded in hinges with two points of attachment per split lid.
- Wheel free design to deter from excessive movement.
- Designed with no-slip side guards. Prevents container from slipping into truck body.
- HDPE (High Density Polyethylene) products are recyclable.
- Optional features available.

INTERCHANGEABLE LIDS

- 70/30 type lids have bilingual, use message molded into lid.
- 50/50 type lids allow ease for recycling or large bag use.
- Compatible with 200-300-450G cans.
- Made from rotationally-molded HDPE.
- Lid assemblies have four “molded-in” hinges.
- Lid is secured with HDPE plastic pins and clips.
- Domed top and overlapping edges.
- Designed to prevent from going over 90° breaking point.
- Lids are available in custom colors to designate waste type.
